

SOUTHS UNITED FOOTBALL CLUB INC

MEDIA RELEASE

Unveiling FIFA Approved Synthetic Football Turf Fields

As part of Team Quirk's 2012 Election Promise, Souths United Football Club would be provided with funding to refurbish, redress and develop new fields at their club.

'Runcorn is a growing area and Team Quirk is committed to providing great sporting facilities. I am pleased to be able to offer this new facility to

MacGregor Ward residents and I look forward to seeing locals enjoy it as part of an active and healthy lifestyle,' Cr Huang said.

Lord Mayor Graham Quirk said the funding was part of his team's ongoing commitment to delivering more recreational opportunities for Brisbane residents of all ages.

'I want Brisbane to be Australia's new world city with facilities to match. Upgrades such as those which are to be developed in the MacGregor Ward are another step towards reaching our goal,' he said.

Souths United would like to thank Lord Mayor Graham Quirk, Cr Steven Huang and the Brisbane City Council for providing \$2.276 million to the upgrade of fields and lighting.

The new fields and lighting upgrade will provide facilities for use by members and also local schools and the community.

Souths United is proud to offer opportunities to both elite and social players from the age of 3 years to over 35s. Souths United has been given a license to conduct the National Premier Leagues competition for female players. The National Premier Leagues is FFA's second tier club competition sitting under the W-League.

Souths United also has teams in all Super Youth League age groups, Capital League men and Womens Premier League as well as social teams from 3yo to Over 35s.

Souths United is committed to player and coach development. Souths United is a community-based, volunteer-run, not-for-profit organisation. We have a close relationship with local schools and will be working closely with children with a disability to ensure they can enjoy the football experience.

The project commenced in November 2014 and will finish in March 2015.
